Refueling Opening the fuel tank cap Perform the following steps to open the fuel tank cap. ■Before refueling the vehicle Turn the engine switch OFF and ensure that all the doors and windows are closed. ■Opening the fuel tank cap Pull up the fuel filler door opener. Turn the fuel tank cap slowly to open. Hang the fuel tank cap on the back of the fuel filler door. STEP1 STEP2 STEP3 Page 62 of 44862 1-5. Refueling Closing the fuel tank cap When replacing the fuel tank cap, turn it until a clicking sound is heard. After releasing your hand, the cap will turn slightly to the opposite direction. ■Fuel type Unleaded gasoline (Octane rating 87 [Research Octane Number 91] or higher) ■Fuel tank capacity 13.2 gal. (50 L, 10.9 imp. gal.) Page 63 of 44863 1-5. Refueling 1 Before driving CAUTION ■Refueling the vehicle Observe the following precautions while refueling the vehicle. Failure to do so may result in death or serious injury. ●Touch the vehicle or some other metal surface to discharge any static electricity. Sparks resulting from discharging static electricity may cause the fuel vapors to ignite. ●Always hold the grips on the fuel tank cap and turn it slowly to remove it. A whooshing sound may be heard when the fuel tank cap is loosened. Wait until the sound cannot be heard before fully removing the cap. In hot weather, pressurized fuel may spray out of the filler neck and cause injury. ●Do not allow anyone that has not discharged static electricity from their bodies to come close to an open fuel tank. ●Do not inhale vaporized fuel. Fuel contains substances that are harmful if inhaled. ●Do not smoke while refueling the vehicle. Doing so may cause the fuel to ignite and cause a fire. ●Do not return to the vehicle or touch any person or object that is statically charged. This may cause static electricity to build up, resulting in a possible ignition hazard. ■When replacing the fuel cap Do not use anything but a genuine Toyota fuel tank cap designed for your vehicle. Doing so may cause a fire or other incident which may result in death or serious injury. Page 64 of 44864 1-5. Refueling NOTICE ■Refueling Do not spill fuel during refueling. Doing so may damage the vehicle, such as causing the exhaust systems to operate abnormally or damaging fuel system components or the vehicle's painted surface. Page 65 of 44865 1 Before driving 1-6. Theft deterrent system Engine immobilizer system ■System maintenance The vehicle has a maintenance-free type of engine immobilizer system. ■Conditions that may cause the system to malfunction ●If the key is in contact with a metallic object ●If the key is in close proximity to or touching a key to the security system (key with a built-in transponder chip) of another vehicle ■Certifications for the engine immobilizer system (for vehicles sold in U.S.A.) FCC ID: MOZRI-21BTY This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. ■Certifications for the engine immobilizer system (for vehicles sold in Canada) This device complies with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. ■Certifications for the engine immobilizer system (for vehicles sold in U.S.A.) FCC ID: MOZRI-21BTY This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Page 66 of 44866 1-6. Theft deterrent system CAUTION Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTICE ■To prevent damage to the key Do not modify, remove or disable the engine immobilizer system. If any unauthorized changes or modifications are made, the proper operation of the system cannot be guaranteed. Page 67 of 44867 1 1-6. Theft deterrent system Before driving Theft prevention labels (for U.S.A.) These labels are attached to the vehicle to reduce vehicle theft by facilitating the tracing and recovery of parts from sto- len vehicles. Do not remove under penalty of law. Page 68 of 44868 1-7. Safety information Correct driving posture Drive in a good posture as follows. Sit upright and well back in the seat. (P. 3 7) Adjust the position of the seat forward or backward to ensure the pedals can be reached and easily depressed to the extent required. (P. 37) Adjust the seatback so that the controls are easily oper- able. Adjust the tilt and telescopic positions of the steering wheel downward so the air- bag is facing your chest. (P. 51) Lock the head restraint in place with the center of the head restraint closest to the top of your ears. (P. 43) Wear the seat belt correctly. (P. 45) Page 69 of 44869 1-7. Safety information 1 Before driving CAUTION ■While driving ●Do not adjust the position of the driver's seat while driving. Doing so could cause the driver to lose control of the vehicle. ●Do not place a cushion between the driver or passenger and the seatback. A cushion may prevent correct posture from being achieved, and reduce the effectiveness of the seat belt and head restraint, increasing the risk of death or serious injury to the driver or passenger. ●Do not place anything under the front seats. Objects placed under the front seats may become jammed in the seat tracks and stop the seat from locking in place. This may lead to an acci- dent. The adjustment mechanism may also be damaged. ■Adjusting the seat position ●Take care when adjusting the seat position to ensure that other passen- gers are not injured by the moving seat. ●Do not put your hands under the seat or near the moving parts to avoid injury. Fingers or hands may become jammed in the seat mechanism. Page 70 of 44870 1-7. Safety information SRS airbags The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury. Front airbags Driver airbag and front passenger airbag Can help protect the head and chest of the driver and front pas- senger from impact with interior components. Side and curtain shield airbags Side airbags Can help protect the torso of the front seat occupants. Curtain shield airbags Can help protect primarily the head of occupants in the outer seats. Trending: Torque, buttons, Pressure, service interval, brake fluid, checking oil, front seat
